

**Vastly improves patient maternity care by leading Providers through an appropriate care-plan based on approved maternity guidelines, enabling care to be easily shared between Provider, Lead Maternity Carer and DHB**

- ✦ Improves the delivery of shared care maternity services
- ✦ Enables Providers to ensure that all applicable tests and checks have been completed
- ✦ Improves compliance with guidelines
- ✦ Provides immediate real-time status information on registrations, with reporting on key data
- ✦ Gives the Provider and the DHB immediate visibility on funded services provided
- ✦ Provides flexibility as to the type of care available to the patient
- ✦ Integrated with Medtech or MyPractice Patient Management Systems
- ✦ Created with credible clinical partners, Counties Manukau District Health Board

# Dynamic and interactive, links Providers to DHB; clear visibility on the status of registrations; improved care for the patient

## Benefits of SCPMS

### To the DHB

- ✦ Immediately see when a patient has been registered, enabling them to be 'booked in' to the applicable hospital
- ✦ Allows the care provided to be shared between the Provider and the Lead Maternity Carer, with all data contributing to one registration
- ✦ View real time registration status information
- ✦ View funding on a Practice and/or Provider basis
- ✦ Run real time status reports / key performance indicator reports

### To the Provider

- ✦ Register a patient and the patient is immediately 'booked in' with the DHB
- ✦ Receive prompts when completing the patient registration to ensure that all important information is entered
- ✦ Complete on-going assessments at the appropriate stage in the pregnancy
- ✦ Follow the care plan which shows the maternity checks that need to be carried out and when
- ✦ Reduced data entry due to pre-population of key data fields from the PMS
- ✦ See the progress of the patient through the summary of assessment information
- ✦ Print a summary of all assessments and provide it to the patient
- ✦ Receive funding based on the assessments provided
- ✦ Provide the patient with material from specifically targeted web links
